Length	<b>3000mm</b>
Width	<b>4425mm</b>

Pumphouse - **Dependant on final spec**

Wickham's range of vehicle cleaning systems are a combined result of industry knowledge built up since Wickham began in 1958.

The Hurricane was one of the first wheel and under body wash systems on the market and can still be seen in operation at a wide variety of sites and industries all over the UK. The Hurricane range offers any site the perfect solution for a permanent system capable of dealing with a wide range of vehicles without the worry of weight or width restrictions.

The Double Hurricane bridges the gap between the Single Hurricane and the heavy duty Monsoon system. Two Hurricane units are spaced 1 mtr apart and gives a 2nd wash of the vehicles wheels and under body as the vehicle passes through. This can be achieved by simply using a single higher performance pump. Both units work simultaneously and provide a superb washing facility whilst taking up minimal space.

The spray configuration has a total of 40 high flow spray nozzles, 2 under body spray booms each fitted with 12 spray nozzles and 4 side spray booms each fitted with 4 spray nozzles. Each spray boom oscillates automatically 40 times a minute through 90 degrees, which ensures complete effective coverage. Wickham are the only company to offer the oscillating boom feature in its wheel and under body wash systems. By oscillating each boom we are able to cover the same area as a fixed spray system whilst using fewer nozzles resulting in lower water and power consumption, lowering overall running costs.

The system comes complete with an insulated container, which houses a clean water header tank, mechanical filter, pump and control system and associated fittings. Delivered completely piped and wired ready for installation, it enables relocation should the system need to be moved in the future.

**Oscillating Spray**

**Secure Pump House**

**Compact**

**Bespoke Options**

## System Specification

- Suitable for vehicles up to 44 tonne. Heavier vehicle options available.
- Suitable for rigid axel and articulated vehicles.
- No maximum vehicle width. (built to order).
- Containerised pump house and header tank.
- High power multistage wash pump.
- Automatic waste return pump.
- Automatic wash activation.
- 40 High flow spray nozzles.

## Key Features

- Oscillating spray booms.
- Secure, containerised pump house.
- Compact design for minimal impact.
- Flexible applications, bespoke options available.
